Software Engineer with 3+ years of experience developing scalable cloud-based applications, automation frameworks, and distributed systems. Proficient in Python, SQL, and software engineering best practices including object-oriented programming, clean code, CI/CD, automated testing, and observability.

PROFESSIONAL EXPERIENCE

Software Developer (IC2) — Oracle - May 2023 – Sep 2025

- Designed and developed scalable backend services and cloud-native applications following object-oriented design principles and clean code practices.
- Built and maintained REST APIs and service integrations supporting large-scale distributed cloud environments.
- Developed automation tools and internal utilities using Python and Java to improve operational efficiency and troubleshooting workflows.
- Created and maintained CI/CD pipelines that streamlined deployments and reduced release risks. ● Implemented integration testing frameworks and automated validation processes to ensure software quality across multiple services.
- Investigated and resolved production issues across distributed systems running in Linux-based cloud environments.
- Collaborated with cross-functional teams to monitor service health, analyze application performance, and improve system reliability.
- Participated in code reviews, architecture discussions, sprint planning, and Agile development processes

Software Engineering Intern — Oracle - Sep 2022 – May 2023

- Implemented automated tests for Oracle Cloud OSMH services in Python and Java, increasing reliability.
- Extended internal QA framework to streamline OCI instance setup, cutting provisioning time during testing.
- Leveraged Linux command-line tools to optimize workflows and troubleshoot distributed systems.

EDUCATION

Instituto Tecnológico y de Estudios Superiores de Occidente (ITESO) - Aug 2018 – May 2023

- B.S. in Computer Systems Engineering | GPA: 9.55 / 10

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, Go, C
Data & Analytics: SQL Query Optimization, Data Modeling, Data Validation, ETL Concepts, Analytical Queries
Software Engineering: Object-Oriented Programming (OOP), Clean Code, Design Patterns, Modular Architecture, REST APIs, Microservices
Databases: SQL, Relational Database Principles, NoSQL
Infrastructure & Tools: Linux, Git, CI/CD, Deployment Automation, Cloud Infrastructure (OCI)

Development Practices: Agile Scrum, Software Development Life Cycle, Debugging Distributed System
